

Welcome Address

By

Prof. (Dr.) Mridu Dudeja
Dean, HIMSR & HAHCH

Good morning!!

On behalf of entire medical faculty & Management of Hamdard Institute of Medical Sciences & Research, I welcome the new batch of MBBS students to HIMSR family and would like to congratulate each one of you for crossing a milestone to enter the medical college.

This is a Proud moment.....

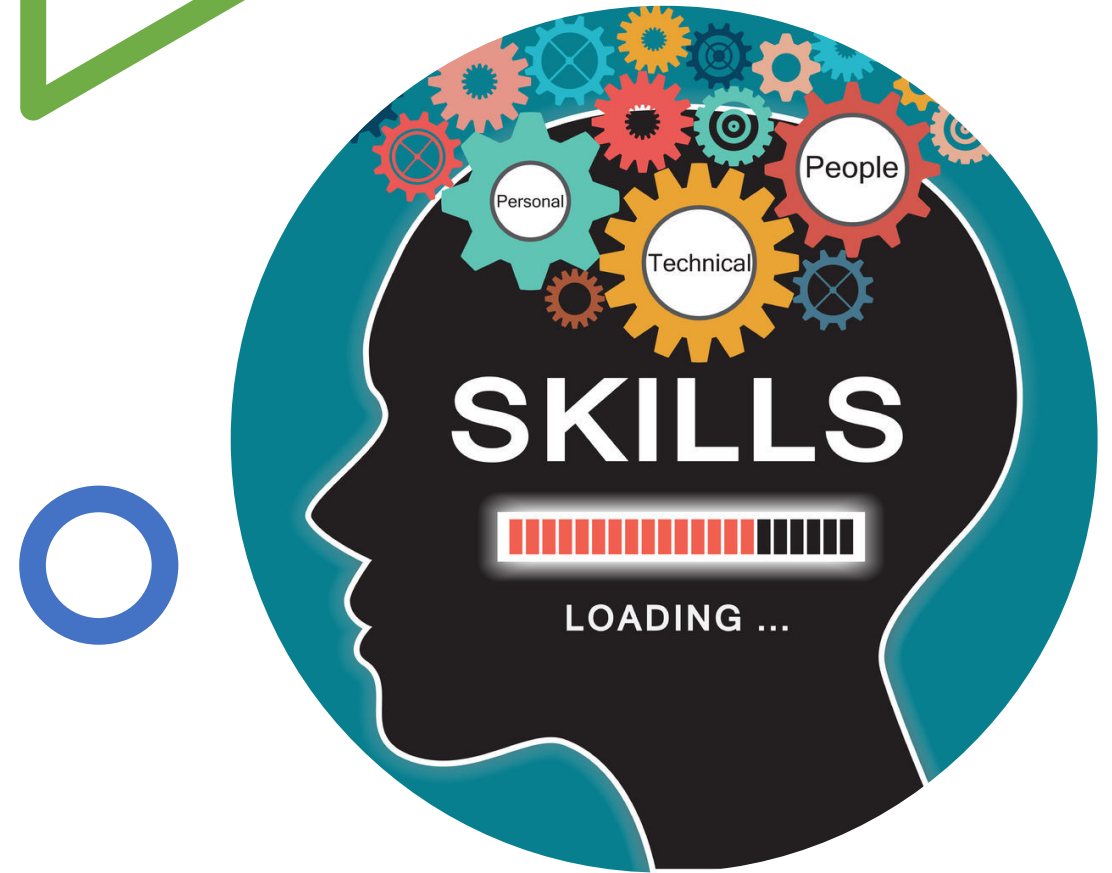

As you are about to embark upon an aristocratic journey that will not only change your life but will also impact the lives of many others around you through your education & training.

You must consider yourselves fortunate to be able to do so. But that will only be possible if you do not take it easy and try to imbibe the learnings to the best of your capabilities.

I am extremely confident that at the end of your course, if you show your serious commitment towards it, you will be armed with illustrious knowledge, skills & high level of Competence that will position you not only as good doctors but also as role model for many others.

HIMSR's incredibly talented faculty
are your greatest resource.
They will motivate you, guide you
And help you to open doors to your
new possibilities & opportunities.

Here you will discover a beautiful campus bursting with numerous academic & extra curricular activities that will aid in your integrated development. As you set out on this incredible journey, I want you to consider the difference between education and training.

Education means “to raise up” or “to lead out”. It is the preparation of the “Unknown”

Training is a Latin word meaning ,”To drag” or “To pull after” is a preparation of the “Known”.

We at HIMSR strive at preparing you for both, “Known and Unknown” challenges that lay ahead so that you can become one day as world class doctors.

I speak for the entire faculty and management at HIMSR in saying that we are extremely delighted to welcome you into this vibrant learning Community of HIMSR for the momentous journey of your life....

Welcome aboard!!

Thank
You
