

HAMDARD INSTITUTE OF MEDICAL SCIENCES AND RESEARCH, New Delhi

HIMSR Publication Report

Year 2024

Prepared by: **Dr. Yasir Alvi** Associate Professor

The Hamdard Institute of Medical Sciences and Research (HIMSR) is recognised as an institution of national importance, committed to setting high standards in undergraduate and postgraduate medical education across all disciplines. HIMSR is dedicated to expanding its influence in the life sciences and health domains. Research and publication are integral to advancing medical knowledge, improving patient care, and fostering academic excellence within the medical fraternity. HIMSR recognises the importance of these activities in achieving its goal to serve suffering humanity and contribute to healthcare.

This report provides an overview of the publications by HIMSR faculties in 2024. The report also highlights the importance of indexing in reputable databases such as PubMed, Web of Science, Scopus, DOAJ, and Embase, and advises faculty to avoid publishing in non-NMC indexed journals, as these are often predatory journals.

The report includes key metrics such as:

- Total number of publications
- Indexing of publications
- A list of top articles with the highest impact factors
- A list of publications fulfilling NMC criteria
- Department-wise publication data
- A list of the top researchers at HIMSR based on total publications

Table 1: Total number of publication by faculties of HIMSR in the year 2024

| Total Publication (including Books) | 179 |
|-------------------------------------|-------------|
| Total Journal Publication | 155 |
| Original article | 104 (67.1%) |
| Case series | 1 (0.6%) |
| Case report | 21 (13.5%) |
| Review | 23 (14.8%) |
| Editorial | 2 (1.3%) |
| Letter to editor | 3 (1.9%) |
| Correspondence | 1(0.6%) |

| Total Books & Book chapters Publication | 24 |
|---|------------|
| Books Publication | 2 (8.3%) |
| Book chapters Publication | 22 (91.7%) |

In 2024, the faculty of HIMSR collectively published 179 works, encompassing both journal articles and book chapters. The majority of these publications were journal-based, numbering 155, with 104 being original articles (67.1%), 21 case reports (13.5%), and 23 reviews (14.8%). The remaining 24 publications consisted of books and book chapters. A notable portion of the publications comprised case reports, review articles, editorials, and book chapters, which are not factored in by the NMC for academic promotions.

Table 2: Indexing of publication by faculties of HIMSR in the year 2024.

| Total Publication | 155 |
|---------------------------------------|-------------|
| Indexing according to NMC | 115 (74.2%) |
| PubMed | 57 (36.8%) |
| Web of Science (having Impact Factor) | 66 (42.6%) |
| Only Scopus | 15 (9.7%) |
| Only DOAJ | 15 (9.7%) |
| Only Embase | 22 (14.2%) |
| Non NMC index journal | 40 (25.8%) |

Indexing in reputable databases is often seen as a mark of quality. If a journal is indexed in reputable databases, it suggests that it meets certain standards for peer review, content, and relevance within its field. It is also one of the four thing NMC led guidelines for academic publications. According to this NMC guidelines, articles which will be counted for academic publication, should be indexed either in PubMed (Medline), Web of Science, Scopus, DOAJ or Embase. In medical literature, researcher values PubMed indexing more as we often use PubMed library for our initial literature search. Scopus and Web of Science indexing are also

have good quality journals listing. DOAJ and Embase indexing are also good, although their policies for indexing is not as stringent as the PubMed, thus values lower than them.

There were a total of 155 journal peer reviewed publication by all the faculties of HIMSR in the year 2024. Majority of these publication were published in journals which meets NMC criteria (74.2%). PubMed and Web of Science indexing was preferred by the faculties (36.8% and 42.6%). It is worthwhile to note that there were more than one fourth (25.8%) articles published in Non NMC index journal. It is advised to the faculties to try to avoid Non NMC index journals, as they are often predatory journals.

How can I look for indexing of a journal?

- Always look for indexing of the journal when you are submitting the article. Journals often display their indexing at their "homepage" and at "about the journal" page. There is a tendency in poor quality journals, particularly predatory journals to misled the researcher in displaying indexing. Indexing is a dynamic process, and journals can be removed from Indexing databases.
- Double check the indexing at the indexing agency.
- PubMed/ MEDLINE indexing can be access
 via: https://www.ncbi.nlm.nih.gov/nlmcatalog/
- Scopus: Visit the official website for its indexing journal list
 <u>www.scopus.com</u>
- Web of Science: The most reliable way to check Web of Science indexing is Master Journal List (MJL) provided by Clarivate Analytics. You can find it here: <u>http://mjl.clarivate.com/</u>
- **DOAJ:** Visit the DOAJ website at <u>https://doaj.org/</u> for its journal listing
- For Embase, visit the Embase Coverage Page, <u>https://www.elsevier.com/en-in/products/embase/content</u> and Download a list of journals currently covered in Embase, and search for the journal in the downloaded excel file.
- The indexing is dynamic process. A journal may have been indexed in PubMed in the past, but due to any reason, it might be removed from it. Kindly look for active indexing coverage every time you decide to published the article in that journal

Journals indexed in reputable databases are seen to meet standards for peer review, content, and relevance. Articles considered for academic publication should be indexed in PubMed (Medline), Web of Science, Scopus, DOAJ, or Embase. PubMed indexing is highly valued in medical literature, with Scopus and Web of Science also listing good quality journals. DOAJ and Embase are also good, although their policies for indexing may not be as stringent as PubMed.

Journal Impact factor:

The Journal Impact Factor is a widely used metric to assess the influence of academic journals. It is worthwhile to note that, Impact factor is often mislead by many predatory journals. The real Journal Impact Factor is calculated annually by Clarivate Analytics and published in the Journal Citation Reports (JCR). Clarivate analysis track how often articles in a journal indexed in Web of Science, are cited by other researchers in their publication that are also indexed in Web of Science.

| Article | Authors from HIMSR | Journal | Impact factor |
|---|--|--------------------------------------|------------------|
| Nagral S, Duggal R, Singh S, Shaikh A. Public healthcare system must be a priority for India's new government. BMJ. 2024 Jul 15;386. | Prof. Aqsa Shaikh | BMJ | 93.6 |
| Medigeshi GR, Islam F, Lodha R. Quadrivalent dengue-virus vaccines: challenges and opportunities for India. The Lancet Infectious Diseases. 2024 Feb 23 | Prof. Farzana | The Lancet Infectious Diseases | 36.4 |
| Kulkarni PS, Kawade A, Kohli S, Munshi R, Maliye C, Gogtay NJ, Ravish HS, Singh K, Vengadakrishnan K, Panigrahi SK, Sahoo J. Safety and immunogenicity of a pentavalent meningococcal conjugate vaccine versus a quadrivalent meningococcal conjugate vaccine in adults in India: an observer-blind, randomised, active-controlled, phase 2/3 study. The Lancet Infectious Diseases. 2024 Nov 6. | Prof. Sunil Kohli | The Lancet Infectious Diseases | 36.4 |
| NIHR, Global Health Research Unit on Global Surger. Access to and quality of elective care: a prospective cohort study using hernia surgery as a tracer condition in 83 countries. The Lancet Global Health, Volume 12, Issue 7, e1094 - e1103 https://doi.org/10.1016/S2214- 109X(24)00142-6. | Prof. Musharraf Husain, Dr. Fahad Tauheed Dr.Tajamul Rashid Dr. Sheikh Viqar Manzoor Dr. Sonali Ohri | Lancet Global Health | 19.9 |
| NIHR, Global Health Research Unit on Global Surgery. Global access to technologies to support safe and effective inguinal hernia surgery: prospective, international cohort study; https://doi.org/10.1093/bjs/znae164; British Journal of Surgery, 2024, znae164. | Prof. Musharraf Husain, Dr. Fahad Tauheed Dr.Tajamul Rashid Dr. Sheikh Viqar Manzoor Dr. Sonali Ohri | British Journal of Surgery | 8.7 |

Table 3: Top five articles with highest Impact factor from HIMSR published in 2024

How can I look for Impact Factor

- There is a tendency in poor quality journal to misled the researcher in displaying Impact factor, don't believe them.
- Always look for Journal Impact factor in Journal Citation Reports (JCR). Although it not freely available, but you may find it in ResearchGate website. <u>https://www.researchgate.net</u> or Google Scholar <u>https://scholar.google.com</u>

Table 4: HIMSR published in 2024 fulfilling NMC criteria for academic promotions

| Total Publication | 155 |
|---------------------------------|--------|
| Publication counted for NMC | 61 (%) |
| Publication not counted for NMC | 94 (%) |

The NMC (National Medical Commission) criteria for academic publications in India are designed to ensure quality and ethical standards in research. The **Key Aspects of NMC Criteria includes**:

Journals Indexed in Reputable Databases: The NMC emphasizes publications in journals indexed in well-recognized databases. These often include:

- **PubMed/MEDLINE:** A primary database for biomedical literature.
- **Scopus:** A large abstract and citation database of peer-reviewed literature.
- Web of Science: Another highly regarded citation indexing service.
- o DOAJ
- Embase

Type of Publication: Types of publications which are included in NMC criteria are

- Original research articles
- Metanalysis
- Systemic review
- Case series.

Authorship: The NMC counts publications with following authorship

First, Second, Third, and corresponding. In the recent NMC revision, corresponding authorship is removed from the criteria.

Table 5: Total number of Book and Book chapter publication by faculties of HIMSR in the year 2024

| Faculties Name | Book Chapter | Editor/Co editor |
|----------------------------|--------------|------------------|
| Biochemistry | 2 | - |
| Dr Kailash Chandra | 1 | - |
| Dr. Jaspreet Kaur | 1 | - |
| Obstetrics and Gynaecology | 21 | 2 |
| Dr. Aruna Nigam | 16 | 2 |
| Dr. Arifa Anwar Ilahi | 1 | 1 |
| Dr. Sumedha Sharma | - | 1 |
| Dr. Dina Aisha Khan | 1 | - |
| Dr. Nidhi Gupta | 3 | 1 |
| Dr. Supriya Chaubey | 2 | - |

Table 6: List of Book publication by faculties of HIMSR in the year 2024

| Book Title | Editors from HIMSR | Publication |
|--|--|--------------------|
| Handbook of Drugs in Obstetrics & Gynaecology 2024 | Dr. Aruna Nigam, Dr. Nidhi Gupta | Evangel publishers |
| Recent Advances in Obstetrics & Gynaecology 3rd Vol 2024, Nigam A, Kriplani A. | Dr. Aruna Nigam, Dr. Arifa Anwar Ilahi, Dr. Sumedha Sharma | Evangel publishers |

In 2024, HIMSR faculty members published a total of 24 books and book chapters. This total is comprised of 2 books and 22 book chapters. The Department of Obstetrics and Gynaecology contributed significantly with 21 book chapters and 2 editors/co-editors. Dr. Aruna Nigam was a major contributor with 16 book chapters and 2 editor/co-editor roles.

Department wise PUBLICATION

Reference: Google Scholar and ResearchGate account.

We have observed that some of HIMSR faculties may not yet have a Google Scholar and ResearchGate accounts. We encourage you to create and maintain these accounts, as they serve as valuable platforms for showcasing your research, connecting with fellow researchers, and enhancing collaboration. Keeping your profiles updated will contribute to increased visibility and engagement within the academic community and of HIMSR's contributions.
